and a better life for all*

## Application for trees - What we need to know

Firstly, we need to be confident that the location for our trees is 'permanent', Although we realise there are never any guarantees it is important to remember that Tree Appeal's focus is on habitat creation, biodiversity targets and social benefits. So, we need to be sure that our trees will be planted where they have the best chance of reaching their full potential.

We need you to describe your project for us in simple terms. It doesn't need to be an essay, just a few lines. Things we like to know are, for example:

- Where exactly is it? Do you have an OS map reference?
- Why are trees being planted?
- Is it accessible to the public?
- Is it part of curriculum activities?
- Will it help meet local bio-diversity targets?
- Are there any rare or special species locally?
- Is it a Site of Special Scientific Interest or similar?

We plant trees to promote biodiversity, create woodland habitats and provide social benefits to the wider community. ***Please note that some of our corporate partners, who sponsor the trees, do so as part of their carbon offsetting programme. Therefore, to avoid any risk of 'double accounting' you should not consider using Tree Appeal trees as a means to offset your carbon footprint.***

The following species are some of the trees that can be requested, depending on availability: *Field Maple, Common Alder, Silver Birch, Downy Birch, Green Beech, Ash, Crab Apple, Cherry, Sessile Oak, English Oak, Rowan, Crack Willow, Goat Willow, Small Leaved Lime, Hawthorn, Hazel, Blackthorn, Dog Rose, Guelder Rose.* If there are other species you need, please ask. The cell grown 'whips' are delivered free including canes and rabbit spirals.

***Trees are supplied in minimum batches of 10 per species. For example, you could request 11 oaks, 10 ash and 17 beech but we cannot supply fewer than 10 of any one species.***

The planting season usually runs from November through to March but you can make your application at any time. The sooner the better, we suggest.

Finally, if you want to tell us lots more about your school and your environmental projects, don't be limited by this form. If there is not enough space here please feel free to add some pages. If you have some questions please call or email.
